KNOW-HOW

CRYSTAL BLOWING

Just like the myth of Prometheus (recounted in our History), crystal is also born from a combustion. The magic of crystal is made when the molten material forms a glowing ball, at a temperature of 1200°C (2192°F).

The glass craftsmen must then carry out a continuous rotation of the cane in order to obtain a homogeneous form, forming what essentially is crystal. All in all, crystal is one of the most poetic materials there is: a product of the fusion of the purest earth, fine and immaculate sand, offering a perfect refraction of sunlight.

The factory is specialized in the making of custom-made molds, allowing the continuous concrete realization of our new collection designs.

The realization of the drawings and prototypes is carried out in our offices, while the manufacturing of the molds is entrusted to a specialist and carried out under a short period of time ; an efficient teamwork for a perfect harmony.

KNOW-HOW

CRYSTAL CUTTING

Freehand cutting gives each piece its unique character.

The cutting is done cold, when the crystal has been previously blown and the shape of the piece shaped, all done by hand.

The rough outline and cutting are done with sandstone or diamond grindstones, rotating at very high speed.

A gentle trickle of precious water, mixed with sand, flows over the grindstone: the water cools the piece down, and the sand reinforces its work.

The pieces made by factory stand out thanks to a wide variety of crystal cuts, going from the most traditional (diamonds, stars, flat cuts, bevels ...) to the most modern, both in their entity as in their use.

Moreover, this work is carried out with great mastery, sometimes imposing a game of expert meticulousness with the strength of the material.

KNOW-HOW

BRONZE CRAFTING

Working in close collaboration with smelting plants in the Grand Est region, is keen to highlight regional know-how and offers majestic pieces combining crystal and bronze.

The bronze pieces are melted in molds belonging to the factory,, made on command and arriving in our workshops in separate pieces.

The assembly of the bronze and the crystal parts is done in our workshops. The welding work is entirely done in our workshops, by our master bronze worker.

Once the composition of the bronze piece is finished, the skeleton is sent to gilding. The piece is then entirely immersed in a 24-carat gold bath or in a platinum bath for a shiny and ravishing final result.

Chess game set

Crystal, black wood and gold come together in the Napoléon chess set.

The game board offers a traditional crystalline duality, with a choice of two colours for the pieces, all surrounded by black wood for a more academic look. Finally, our pieces are made entirely of clear and coloured crystal.

Their design is a cross between modern and traditional for the perfect timeless look. Each type of piece is cut according to the traditional conception of the piece, and raised by a sandblasted coloured crystal foot, for added visual impact as well as a comfortable grip.

MASTERPIECE

PISCOPIA

Available in clear crystal.
Available in gold finish.

Footed vase

Inspired by the Italian Elena Cornaro Piscopia, the Piscopia planter honors the figure of the woman.

Originally from 17th century Italy and born into a prominent Venetian family, Elena Cornaro Piscopia was the first woman in the world to graduate from university.

Brilliant and curious, she attended the most prestigious salons and academies of the time and ended up with a university degree and a doctorate in philosophy.

She is one of the many important female figures throughout history who participated in the evolution of women's rights. Elegant yet sturdy, the Piscopia footed bowl joins the image of the strong and curious woman. Its infinite diamonds gracefully contrast the apparent softness of the flat and beveled cuts, all crowned with a wide band of pristine gold.

MASTERPIECE

KORÉ

Available in clear crystal and our 13 colours.

Nesting table

Mythically wise, Kore takes its name from the archaic Greek sculpture par excellence. On the Acropolis of Athens, in the 6th century B.C., these statues of young girls were dedicated to Athena, goddess of the city.

Just like each of our creations, each koré statue is exceptional and individualized by the style of its artist. Upright, majestic, powerful: our coffee table brings new life to the ancient Athenian statues. It continues its homage in its meticulous design hand-cut from our precious coloured crystal depicting an elegant snake, referring to the early Cretan representations of the goddess then accompanied by the snake-god Erechtheus.

Its combination with the beautiful raw steel not only matches Koré to her sisters but represents the strength and valour of the divine Koré.

This table is available in large, medium and small models

MASTERPIECE

DIA

Available in clear crystal and our 13 colours.

Nesting table

The eldest of our three crystal nesting tables, Dia pulls any space it dresses towards the stars.

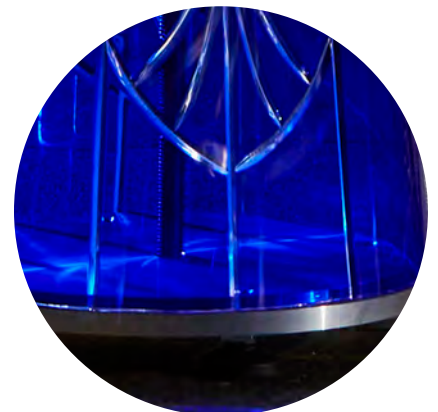

Named after Jupiter's satellite belonging to the Himalia group, this confident-looking coffee table takes its veteran position seriously and bravely watches over its younger siblings.

Featuring fine bevels hand-cut by our specialists, its coloured crystal cloak is decorated with arched patterns imitating a starry rain. Its luxurious asymmetry gives it an exceptional modernity, and its marriage with pure raw steel enhances the quality of the coloured crystal that will illuminate your space, just like a cosmic entity.
