GEMSTONE PANELS

GEMSTONE SLAB

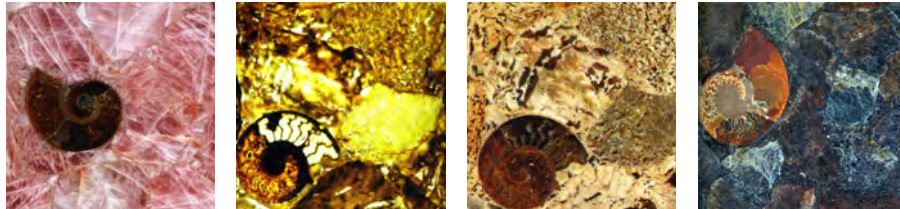

Semi-precious stone

Semiprecious stone collection is a composite panel with a surface collected from precious stones and minerals: lapis lazuli, jasper, agate, malachite, tiger eye and other rare types of stone.

Optionally, you can add fossilized seashells and Ammonites – extinct millions of years ago, a subclass of cephalopods.

Edelstein

Precious Stone Collection ist eine Verbundplatte, deren Oberfläche aus Edelsteinen und Mineralien besteht: Lapislazuli, Jaspis, Achat, Malachit, Tigerauge und andere seltene Steinarten.

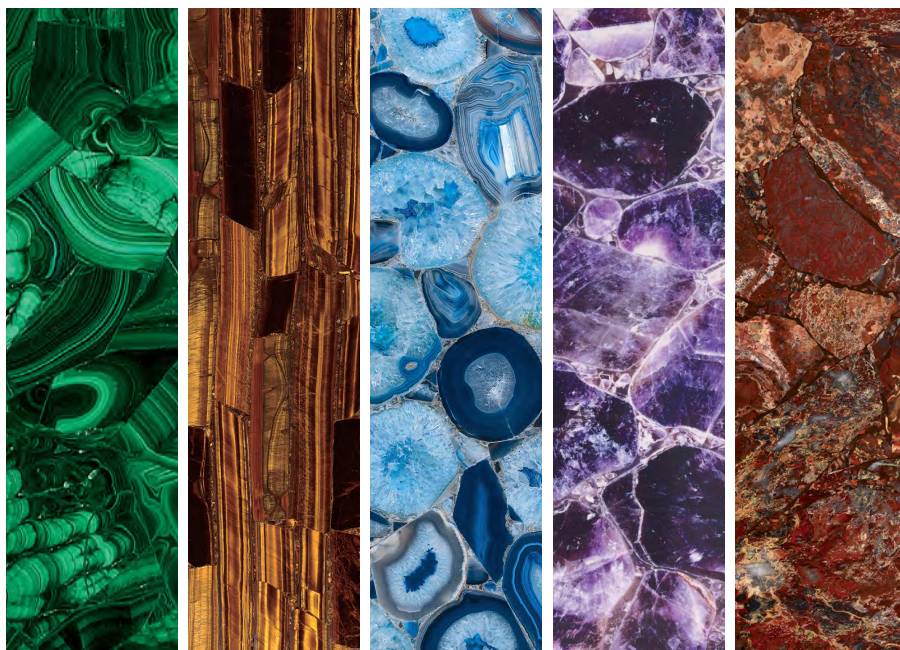

Es sind die Ergänzungen der versteinerten kleinen Muscheln und Ammoniten – der Mollusken der Millionen aussterbenden Jahre rückwärts möglich.

Piedra preciosa

La colección de piedras preciosas es un panel compuesto con una superficie ensamblada de piedras preciosas y minerales: lapislázuli, jaspe, ágata, malaquita, ojo de tigre y otros tipos raros de piedra.

Son posibles de buen grado las adiciones de las conchas petrificadas y las Amonitas – los años, que se han extinguido unos millones, atrás subclase de los cefalópodos de los moluscos.

This brochure showcases examples of stones. View the full collection on our website.

Glassonyx

Glassonyx is the composite stone consisting of an ultra thin layer of natural stone and backlit glass base.

Stone collections: Glassonyx (onyx, agate, amethyst, jade, translucent marbles.)

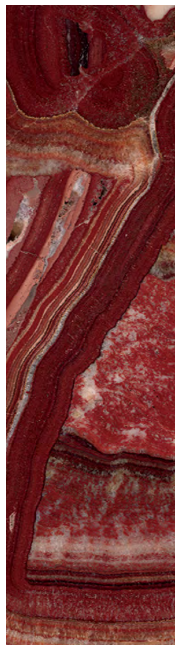

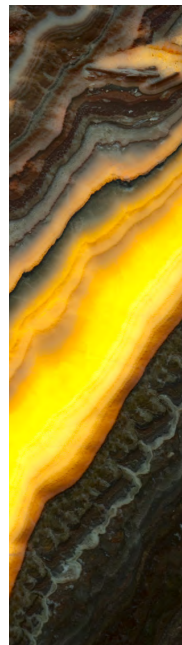

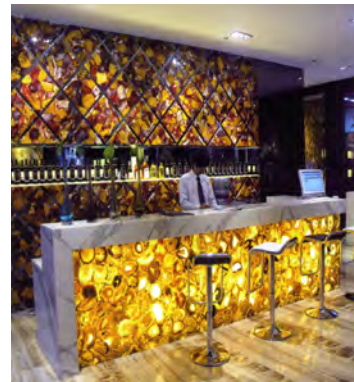

Glassonyx ist Verbundstein, der aus die ultradünne Schicht Natursteins und der Glasgrundlage besteht.

Steinkollektionen: Glassonyx (der Onyx, den Achat, den Amethyst, u.a.)

Es piedra compuesta de una capa ultrafina de piedra natural y una base de vidrio.

Colecciones de piedra: Glassonyx (la ónice, la ágata, la amatista, la jadeíta etc.)
